Our department

It is being maintained in cooperation with the Faculty Thomayer Hospital, a modern big university hospital with many departments. It means - Internal Clinic, Nephrology, Diabetology, Oncology, Rheumatology, Urology, Emergency Department, Pediatric Department, Hospital Labs etc.

Faculty Thomayer Hospital (FTNsP) performs the Clinical studies of effectivity & safety drugs - studies (phase II. & III.) many years. This Clinical studies are provided with cooperation of national and international pharmaceutical companies. We provide this studies under control of national and international authorities (State Institute for Drugs Control, Ethic Kommittee) and there are liable to national and international audites to strictly comply with the rules of the EU.

Clinical - Farmacology Unit is new department of Clinical research, which is specialized for studies for phase I. & II.

In this time we have available 24 - 32 beds of above standard department for farmacokinetics & bioequivalence studies.

In 2008 we succesfully finished our first pilot Clinical trials under the supervision of international auditor.
