

Are you afraid your child is a drug user?

Our medical laboratory can offer drug test from an urine sample brought by yourself (even anonymously) paid in cash. The test result is available in several minutes.

Why in urine?

Most of the drugs is very fast absorbed from the blood whereas they have been outlasting for a much longer time in urine (f.e. cannabinoids for 3-7 days in a single use and for several weeks in repeated use, amphetamines for 3-4 days, opioids or cocain for 3 days).

Which drugs can be tested?

10 drug groups in one sample: **cannabinoides** (marihuana, hashis), **metamfetamines** („pervitin“), **opioides** (f.e. morphin or heroin), **cocain**, **tricyclic antidepressives**, **amphetamines**, **benzodiazepines**, **barbiturates**, **ecstasy** (MDMA), **methadon**.

The prize: 350,- Kč

When: daily from 8:00 till 18:00 h

If you are interest in drug-testing, please contact our laboratory:
